# Visibility in your clean room! CORRTEC VINTEC PVC-CTHRU

Within the fab there are several areas where visibility to view a process or operation is required. Tank lids, sight windows, inspection panels and COVID partitions are just a few examples of such applications. Such applications often require Flame Retardancy and Chemical Resistance. Vycom's CORRTEC VINTEC PVC -CTHRU material offers excellent chemical resistance and UL 94-V0 compliancy. The material is weld-able, easy to fabricate and offers a slight blue tint. Available from 1/16th to 1/2" thick sheets.

If your application needs visibility then CORRTEC VINTEC PVC CTHRU may be a perfect option for you and if you need support for your Semiconductor or Electronics applications, then Port Plastics is here for you!
